

READ THIS CAREFULLY

THIS IS HOW YOU CHANGE YOUR LIFE THROUGH TRADING

Hey guys,

Let me be brutally honest with you...

If you master risk management, stay disciplined, and stick to a simple 2–3% growth per day, the numbers you can achieve in 12 months are nothing short of mind-blowing.

But it all starts with ONE rule:

MAX LOSS PER TRADE: 1% OF YOUR ACCOUNT. But happy for you to decide between 1-2% loss due to our win rate, ALWAYS. NO EXCEPTIONS.

Why only 1% to 2% MAX?

Because your job as a trader isn't to gamble - it's to protect your capital, stay calm, stay collected, and let compounding do the heavy lifting for you.

Once you have your plan you must stick to this amount each trade and change your lot size as your account grows.

You're not trying to get rich in one day...

You're trying to build life-changing wealth in 12 months.

And if you stay disciplined?

That becomes very real.

Correct Risk Management (1%–2%) for Gold – 10 Point Stop-Loss
100 pips Max If The loss of pips is ever slightly more calculate the loss
to the amount of pips before placing or just don't trade that set up.

**Here's the risk breakdown and correct lot sizes so you never
over-expose yourself:**

£500 Account

Risk % Max Loss Lot Size

1% £5 0.005

2% £10 0.01

£1,000 Account

Risk % Max Loss Lot Size

1% £10 0.01

2% £20 0.02

£2,000 Account

Risk % Max Loss Lot Size

1% £20 0.02

2% £40 0.04

£10,000 Account

Risk % Max Loss Lot Size

1% £100 0.10

2% £200 0.20

Why These Lot Sizes?

Gold moves like this:

1.00 lot = £100 per point

10-point SL = £1,000 loss on a full lot

Lot Size

=

Max Loss

1000

Lot Size=

1000

Max Loss

This keeps you safe, consistent, and in control - exactly how every profitable trader operates.

NOW LOOK AT WHAT 3% DAILY GROWTH FOR 260 DAYS CAN DO

(That's about one trading year.)

These numbers are **REAL** math... This is why discipline is everything.

Starting Account Value After 260 Days at 3% Daily

£500. £1,088,048

£1,000 £2,176,097

£2,000 £4,352,195

£5,000 £10,880,489

£10,000 £21,760,978

Read those again.

Yes, £500 → £1 MILLION+ with discipline.

Not luck.

Not gambling.

Just consistent controlled growth.

This is why correct risk management is **EVERYTHING**.

If you stick to:

✓ 1% to 2% max loss

(bigger the loss the bigger the gain just make sure comfortable)

✓ 2–8% per day depends on your max loss you are willing to lose.

✓ No greed

✓ No revenge trading

✓ No over-leveraging

Then the next 12 months will be the most life-changing year you've ever experienced.

Remember as your account grows you up your lot size to suit the account size and stick to what ever your max loss is that you have chosen at all times.

Stay disciplined.

Stay calm.

Follow the plan.

Your future self will thank you.

If you follow this you will be living the dream, if you don't that's on you, don't say I didn't say when 50/75% of us in here have stuck to it and are living the dream and you are not in 12 months time.
